<sup>†</sup> The 25 Southern Nevada Water Authority applications shown for 126,054 acre-feet of groundwater exported through a 300-mile-long pipeline annually are open to protest once again after the Nevada Supreme Court sided with the Great Basin Water Network on behalf of protestants and invalidated earlier State Engineer rulings.

<sup>††</sup> Each of the above applications were originally filed by the Las Vegas Valley Water District (LVVWD) and later transferred to the SNWA.
